

TaskPulse API

A scalable, TypeScript-based RESTful API for task management, built with Express, Prisma, and PostgreSQL. Features include user authentication, task CRUD operations, tagging, and filtering/sorting.

Prerequisites:

- **Node.js:** Version 22+ (currently tested on 18.18.2, upgrade recommended for submission)
- **PostgreSQL:** A running instance (e.g., local or cloud-hosted)
- **Thunder Client:** VS Code extension for testing (or Postman/Insomnia)
