

1. Core Functional Requirements

- **Employee Management:** Add, edit, and manage employee details (personal information, job titles, tax details, etc.).
- **Salary Calculation:** Automatic computation of salaries, including basic pay, allowances, bonuses, deductions, and taxes.
- **Payroll Processing:** Generate payslips, manage pay cycles (weekly, bi-weekly, monthly), and handle multiple pay rates.
- **Tax Compliance:** Automated tax calculations, updates to tax rules, and generation of tax forms (e.g., W-2, 1099, T4).
- **Deductions & Benefits:** Manage statutory deductions (e.g., social security, Medicare), benefits (health insurance, retirement plans), and voluntary deductions.
- **Overtime & Leave Management:** Calculate overtime pay, manage vacation, sick leaves, and other time-off policies.

2. Advanced Functional Requirements

- **Direct Deposit:** Integration with banking systems for direct salary deposits.
- **Multi-Currency & Multi-Language Support:** For global organizations with international employees.
- **Compliance Management:** Ensure adherence to local, state, and federal laws.
- **Customizable Reports:** Generate financial reports, audit logs, payroll summaries, and custom reports.

3. Integration Requirements

- **Accounting Software Integration:** Sync with accounting platforms like QuickBooks, Xero, or SAP.
- **HR Management Systems:** Seamless integration with HR software for streamlined employee data handling.
NB (This one we integrate the app to the company database)
- **Time Tracking Systems:** Integrate with time clocks or timesheet software to accurately capture work hours.

4. Security & Data Privacy Requirements

- **Data Encryption:** Secure sensitive employee and financial data with strong encryption protocols.
- **Role-Based Access Control (RBAC):** Restrict access to payroll data based on user roles.
- **Audit Trails:** Maintain logs of all changes for compliance and security audits.

- **Compliance with Data Protection Laws:** Adhere to GDPR, HIPAA, or other relevant data privacy regulations.

5. Usability Requirements

- **User-Friendly Interface:** Simple, intuitive design for easy navigation and task completion.
- **Self-Service Portal:** Allow employees to view payslips, tax forms, and manage personal information.
- **Mobile Accessibility:** Responsive design or mobile app for payroll management on the go.

6. Performance & Scalability Requirements

- **High Availability:** Ensure the system is reliable with minimal downtime.
- **Scalability:** Ability to handle growing numbers of employees and transactions as the business expands.
- **Batch Processing:** Efficient handling of large payroll batches.

7. Legal & Regulatory Requirements

- **Statutory Compliance:** Regular updates to accommodate changes in tax laws and labour regulations.
- **Record Keeping:** Maintain records as per legal requirements for audits and compliance reviews.

8. Support & Maintenance Requirements

- **Technical Support:** 24/7 customer support, especially during payroll periods.
- **Regular Updates:** Frequent updates for new features, security patches, and legal compliance.
- **Documentation & Training:** Comprehensive user manuals and training for administrators and end-users.
