Objective

Aspiring to contribute as a Software Developer in a dynamic and innovative environment where I can leverage my skills in full-stack development, collaboration, and problem-solving. I seek to work on cutting-edge projects that push technological boundaries, foster professional growth, and make a meaningful impact on users and business objectives. With a passion for continuous learning, adaptability to diverse technologies, and a proven track record in delivering high-quality solutions, I am committed to driving innovation and achieving excellence in software development.

Experience

- Telemedia Communications PTY LTD** January 2022 - December 2022
Information Technology Intern
Tech Stack: **React, Next.js, Node.js, IT Security, System Administration, Software Audits**
 - Developed internal web applications using React for front-end interfaces and Node.js for back-end services.
 - Built interactive dashboards for system monitoring and reporting.
 - Assisted in developing RESTful APIs to improve system integration.
 - Monitored and enhanced security policies, conducting regular compliance audits.
 - Provided technical support, ensuring optimal system performance.
 - Assisted in software and hardware installation, upgrades, and troubleshooting.
 - Conducted research to support software development and IT security improvements.
- Innoble Pty Ltd** December 2022 - March 2024
Junior Developer Intern
Tech Stack: **Angular, Next.js, PHP, Node.js, MongoDB, React, React Native, CI/CD Pipelines**
 - Built scalable applications with Angular and React, optimizing UI responsiveness and state management.
 - Developed React Native mobile applications for seamless cross-platform experiences.
 - Designed and optimized database schemas for efficient data retrieval and storage.
 - Improved app performance and integrated cross-browser compatibility.
 - Worked on DevOps tasks, enhancing deployment pipelines and monitoring tools.
 - Developed security measures and implemented disaster recovery strategies.
- Nexia SAB&T** April 2024 -
Junior Developer
Tech Stack: **Next.js, React, React Native, Node.js, SQL, Docker, Jenkins, RESTful APIs**
 - Developed full-stack applications with React and Next.js, ensuring scalability and responsive UI.
 - Designed RESTful APIs and optimized database performance for high-volume data.
 - Built mobile-friendly applications using React Native, ensuring smooth cross-platform experiences.
 - Automated deployment pipelines using Docker and Jenkins, ensuring smooth CI/CD.
 - Implemented monitoring and logging tools for enhanced debugging and performance tracking.
 - Focused on cross-platform compatibility and industry compliance standards.

Education

- Nansindlela Senior Secondary School** 2017
National Senior Certificate
- Tshwane University of Technology** 2022
National Diploma (NDip) in Information Technology: Software Development

Programming Languages & Frameworks

- JavaScript (React, Next.js, React Native, Angular, Node.js, Express.js)
- PHP (Laravel)
- Python
- SQL & NoSQL (MySQL, MongoDB)

Tools & Technologies

- Docker, Jenkins, CI/CD Pipelines
API Development & Integration
DevOps & Deployment
IT Security & Compliance
Cloud Services (Heroku, Firebase)
Version Control (Git, GitHub, Bitbucket)

Projects

- **Peer-to-Peer Lending System**
Developed a financial platform using Laravel, HTML, CSS, JavaScript, Bootstrap, and MySQL, enabling direct user-to-user lending without intermediaries. Implemented Admin, Customer, and Lender roles for a seamless experience.
- **Learner Management System**
Built for the EPF Hackathon using Python, Laravel, HTML, CSS, JavaScript, and Bootstrap. Facilitated real-time communication among parents, teachers, and students, with comprehensive role-based functionality (Admin, Student, Lecturer, Tutor, and Parent).
- **Sick Appeal System**
Created a university-centric platform using Laravel, HTML, CSS, JavaScript, and Bootstrap to allow students to appeal for missed tests due to illness, including document verification. Hosted on Heroku.
- **Weather App**
Completed a 7-day challenge using .Net Maui, HTML, CSS, and Bootstrap to display weekly city forecasts via a free weather API.
- **Ninety Seven eCommerce Store**
Designed an eCommerce platform using Laravel API, Vue3 SPA, and React Native, integrating Redis, MySQL, and Payfast for payments. Implemented Admin CMS Backoffice and Customer roles.
- **Twitter Clone**
Currently developing a social media platform with AngularJS, HTML, CSS, Ng-Zorro, and Python, enabling user posts, comments, retweets, and engagement. Includes Admin and User roles.
- **Hospital Management System**
Built a system with AngularJS, Node.js, HTML, CSS, and Bootstrap to manage patient records, appointments, doctor schedules, and inventory. Role-based access includes Admin, Doctor, and Receptionist.
- **Tenders App**
Developed a tendering information platform using React, Node.js, Java, and MySQL, streamlining the tendering process.
- **Secure Chat App**
Built a WhatsApp-like application with React, Node.js, Java, and MySQL, focusing on secure, real-time communication features for users.
